## EDUCATION

---

- **Madras Institute of Technology Campus, Anna University** Chennai, TN, India  
*MS (by Research) Information and Communication Engineering; CGPA: 8.5/10.0* Dec. 2014 - Dec. 2017
- **K S Rangasamy College of Technology** Namakkal, TN, India  
*Bachelor of Technology in Information Technology; CGPA: 8.52/10.0* June 2011 - May 2014

## EXPERIENCE

---

- **Quantiphi Analytics Solution Private Limited.** Bengaluru, KA, India  
*Senior Platform Engineer* Nov. 2018 - July 2019
  - **Streaming Solutions:** Involved in design and development of cloud deployment architectures on AWS for Walt Disney Parks Resorts, to integrate various cloud services like **Apache Kafka, Lambda, Spark, Amazon RedShift, DynamoDB and HDFS.**
  - **Deep learning Inference Pipeline:** Designed and developed real time inference pipeline for processing live video streams through complex deep learning models like YoloV3, TensorFlow API's, Microsoft Baseline models etc., through services on Google Cloud Platform for Walt Disney Parks Resorts. Also worked on **TensorRT inference server, DAC, Deep Stream 3.0 as part of the project.**
- **Striim Engineering Services (P) Ltd.** Chennai, TN, India  
*Software Engineer (JAVA) & Infrastructure Admin (AWS, Azure, GCP)* Feb. 2017 - Oct. 2018
  - **Streaming Integration:** Involved in development of adapters that could integrate data from different data sources to different cloud based data targets like **Amazon RedShift, Google BigQuery, Azure SQLDataWarehouse** with ability of data recovery.
  - **QA Automation - TestNG:** Developed Integration testing module for QA Team using 'TestNG' and was involved in Jenkins deployment on EC2. Designed and contributed to System Testing topologies mimicking large customer scenarios using **TPC-H/TPC-C** benchmarks.
  - **AWS Infrastructure Administration:** Setup various software infrastructure over EC2 like **Hadoop, Hive with Tez, Kafka, Cassandra, Postgres 9.6 EDB, Kudu, Schema Registry and MongoDB** for proof of concepts based on customer requirements.
- **Babha Atomic Research Centre - Madras Institute of Technology** Chennai, TN, India  
*Junior Research Fellow and Research Scholar* June 2014 - Dec. 2016
  - **Junior Research Fellow - 'Face recognition system with Video Analytics':** Developed a Face Recognition system in Video and person retrieval engine in live video streams using **Dlib, OpenCV & WxWidgets** as part of Department of Atomic Energy-BRNS (Govt. of India) funded research project.
- **Pentafox Technologies (P) Ltd.** Chennai, TN, India  
*Co-Founder/Developer* Jan. 2016 - Jan. 2017
  - **Websites:** Involved in development of websites as Full-stack developer ([www.venuetiger.com](http://www.venuetiger.com), [www.healthicket.com](http://www.healthicket.com), [www.msaaw.in](http://www.msaaw.in), [www.lineofthought.in](http://www.lineofthought.in), [www.pentafox.in](http://www.pentafox.in), [www.issproperties.com](http://www.issproperties.com), [www.interspacesolutions.com](http://www.interspacesolutions.com), [www.ebloodshare.com](http://www.ebloodshare.com), [www.journeymile.com](http://www.journeymile.com), [www.aakkanna.com](http://www.aakkanna.com)) using various frameworks like Node.js, Express, Mongoose, Wordpress, Opencart and Bootstrap.
  - **UI/Logo Designing:** Designed UI for various website development projects using Adobe Illustrator.

## PROJECTS (ACADEMIA)

---

- **Face recognition system in video with Video Analytics (MS Thesis):** A software encompassing Face based recognition system and real time person search on large video logs. The project involves extensive use of Computer vision and Machine learning algorithms for feature extraction, dimensionality reduction, classification, recognition and search space reduction.
- **Resume search engine with an intelligent recommender system (B.Tech Thesis) :** The project deals with extracting, analysing and storing large amounts of resumes (Unstructured data) from applicants into a structured dataset using a Cumulative weight-keying system.

## SKILLSET

---

- **Languages:** Java, Python, Bash
- **Technologies:** Kafka, Kerberos, Jenkins, Terraform, OpenCV, Deep Learning (CNN/RNN - TensorFlow)
- **Databases:** Oracle, MongoDB, Amazon Redshift, Azure SQL DataWarehouse, Snowflake, AuroraDB
- **Toolsets:** Docker, Git, Maven, Eclipse, VS2017, BitBucket, Scikit, PyCharm

## AREAS OF INTEREST

---

- Machine Learning, Computer Vision, Cloud Engineering

## PUBLICATIONS

---
